

Newsletter March 2026 «SWISS NETWORK for DIGITAL MEDICAL REGULATION»

News from our association

A new Board member: Dr. Armand Linge

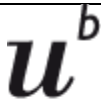

Armand Linge will enter the SNDMR Board as representative of Swiss Med Tech, where Armand has been newly appointed Member of the Executive Board and Head of Regulation & Innovation.

He has 30 years of passion within MedTech's Innovations and Regulations in scale-ups as well as in global organizations.

We welcome Armand to our organization and are very happy to share our issues, ideas and proposals with him while profiting from his large experience.

Robin Bétrisey (Managing Director sitem-insel School (phone +41 31 666 44 54) asked to bring the following education program to your attendance:

University of Bern offers **part-time continuing education programs in the field of medtech regulation and quality management**. In addition to our CAS and MAS in Regulatory Affairs and Quality Management, we also conduct individual modules on very specific (also digital) regulatory topics in the medtech sector.

These offers are aimed specifically at industry professionals and could be very relevant for members of the SNMDR or their employees. Dr. Daniel Delfosse is also involved as a lecturer in one of our modules.

Below are the next training opportunities:

Part-Time Diploma Programs (University of Bern):

CAS in Regulatory Affairs	Sept. 2026 - March 2027
MAS in Regulatory Affairs and Quality Management	Sept. 2026 - Aug. 2028

Short Standalone Modules:	
Combination Products	30.04.2026 and 10.06.2026
FDA Regulatory Affairs	29.04.2026 and 12.06.2026
AI & Digital Health Technologies	04.11.2026 and 09.12.2026

SWISS MEDTECH

Swiss Medtech opened a campaign “Medtech means...”

The Swiss Medtech campaign #MedtechMeansLife shows how valuable the medtech industry is: for innovation, healthcare and the economy. What does medtech mean to you personally? You will hear voices from production halls, start-ups, SMEs, corporations, research, nursing and care.

How to become part of this campaign

What does medtech mean to you personally? We are out and about with our camera, collecting medtech-means statements from our members. Our next live events: General Meeting on 18 May in Lugano and Swiss Medtech Day on 10 June in Bern.

We also offer a simple image option: a photo of you combined with a short statement, which we will publish on our LinkedIn channel, of course only after you have given your express consent. The structure is very simple: «Medtech means ...», followed by your personal thoughts. You can submit your statement in dialect, standard German, French, Italian or English. The more diverse the company logos, faces, roles, perspectives and languages, the stronger the impact.

«Medtech means life» is more than a slogan. From your first breath to your last heartbeat – medical technology is at your side. Often unnoticed. Usually indispensable. Always tireless. It saves, heals, and improves quality of life. Every day. For millions of people. Worldwide.

Around 500,000 different medical devices – from band-aids to surgical robots – shape everyday life in hospitals, doctors’ offices, and other care settings.

How to join this campaign:

Thank you very much for participating!

The members of IG eHealth are addressed for this programme about DigiSanté:

DigiSanté is the federal government's national programme to promote digital transformation in the Swiss healthcare system. The aim is to create the basis for the secure, interoperable and efficient handling of health data and thus to strengthen care, research and innovation in the long term. A key project of DigiSanté is the Swiss Health Data Space (SwissHDS) – Switzerland's

Session 1 – Basics & Classification

Date: March 30, 4:00 – 5:00 p.m.
